## CALL FOR INTERNATIONAL SOLIDARITY SUPPORT TO THE PEOPLE OF EGYPT

"We need urgently your concrete support now! Please mobilize your people, the people everywhere in Europe, call European women to demonstrate in front the Egyptian embassies and to ask for the departure of Mubarak. They don't listen to us; they listen to the European voices. Mubarak is killing his people; he is killing the Egyptian youth. You must help us to stop this. After 30 years of autocratic regime, we want to have power on our own destinies. Mubarak must go now and let us choose our provisional government".

On the phone from Cairo 3<sup>rd</sup> of February morning, Mubarak continues the killing of his own people in front of the eyes of the whole world. People have been organized in millions, resisting blood shed with political and unified national clarity of what they want: no less than end of Mubarak and his regime, **NOW!** In order for the people to be able to open a new and democratic era in Egypt.

European Feminist Initiative (IFE-EFI) demands at this crucial moment, the European Union and all the governments in Europe to call upon and press Mubarak to immediately stop the bloodshed of the protesting people and to immediately leave. European governments have over decades supported totalitarian regimes serving their own interests and it is time that they take the right side of history now. The European Union must finally hear the clear voice of the Egyptian people who demand change **NOW**, before more thousands are killed and injured. The European Union must not miss the opportunity to show that it stands not only on paper but in reality for human rights and democracy!

We call upon the people of Europe to stand and act in solidarity with the Egyptian people; to denounce and protest in front of the Egyptian embassies in each country the brutality and violence used by police and security forces. We firmly support the Egyptian people in their legitimate fight for freedom, justice and democracy.

The women and men in Egypt need more than ever our international support!

The world cannot let Mubarak and his regime massacre Egypt! Egypt cannot wait!
